

Johnny Long Will Play For I. F. C.

All Tech Sing To Be May 17 In Morss Hall

Old Tradition Returns After Several Years; Baton Sponsors Event

Keith P. Lanneau, 6-46, President of the Baton Society has announced that the All Tech Sing will be revived this term, and is scheduled to be held on Friday, May 17 in Walker Memorial. The affair has been defunct during the war years, but with the return of Technology to peacetime conditions, the Sing, an annual tradition, will once more be an outstanding function of the year.

As the name implies, the affair is a singing competition, and all organized groups at Technology, faculty, students, secretaries, and radiation workers are eligible to enter the competition, though groups representing the Musical Clubs are excluded. Sigma Alpha Epsilon fraternity won first prize at the last Sing in 1942, and still has possession of the loving cup which is awarded each time to the winning group.

Entrance Rules Mailed

Rules for entrance are being mailed to all fraternities, and will be posted on dormitory bulletin boards. Extra copies will be available at the Information Office. Application blanks will also be mailed in the very near future, and are to be returned before April 19 to the Musical Clubs Office in Walker Memorial.

The highlight of the evening is the dance to be held after the singing. Tickets for the dance are priced at \$1.80, tax included, and will be placed on sale soon, though there is no admission charge to the competitive part of the program.

Sponsored by Baton Society

This year the Baton Society is sponsoring the contest, and Caliste J. Alster, 2-48, Margareta I. Backer, 2-48, Claude W. Brenner, 2-47, Richard C. Davila, 2-48, John W. Kunstader, 2-48, Lanneau, and William C. Nemitz, Jr., 2-48, form the committee which is handling the arrangements for the evening.

Tau Beta Pi Elects Six New Members

Two Juniors And Four Seniors Receive Honor

Tau Beta Pi, national honorary engineering fraternity, elected six new members to the Technology chapter at a meeting held on Tuesday, March 26, at 7:30 P.M., in the Silver Room of Walker Memorial.

Among the newly elected group are four seniors and two juniors. They are: Kenneth A. Marshall, 9-46; Alfred R. Rose, 9-46; Joseph Schrier, 6-46; James T. Todd, 6-46; Hanford P. Williams, 2-47; and John P. Dyer, 6-47. The election of juniors is in itself a special honor, since only a very small number of third year men have been asked into this national fraternity.

Election to Tau Beta Pi is based on school activity as well as grades. In order to be eligible for election, a student must be in the upper fifth of his class if a senior, or in the upper eighth if in the junior year.

Tau Beta Pi was first organized in 1885. The reason for its coming into being was that the Phi Beta Kappa national fraternity would not accept engineers into its ranks, and at that time there was no recognized national engineering honorary society.

Here's Tech - - Institute Comm. Controls Student Government

Every other Thursday at 5:00 P.M., a group of 30 students assemble in Litchfield Lounge to discuss various issues which directly or indirectly influence approximately 3000 persons. That group is the Institute Committee, and the 3000 persons represent the entire undergraduate student body here at Technology.

The Institute Committee, or Inst. Comm. as it is generally referred to, is not merely a page in the M.I.T. Handbook, or a pseudo-student government organization. It is an active legislative body that effectively regulates every major undergraduate activity at the Institute. To accomplish this purpose it is only natural that the Committee should be a combination of all the student interests, thereby being impartial and just in its decisions.

Inst. Comm. Representatives

This wide range of representation is reflected in the students making up the Institute Committee. There are three representatives from each undergraduate class, the President of the Senior Class being Chairman

of the Committee. At present this position is being filled by David G. Black, Jr., 6-46. Also there is one representative from each of the major or Class A activities.

It is not easy to define a Class A activity, but it may be said to be one which is of sufficient importance to a large number of students. As an example, the M.I.T.A.A. and Interfraternity Conference are considered Class A activities, whereas individual student professional societies are typical of Class B status.

Heavy Schedule

At present the Institute Committee is engaged in a number of tasks, the Red Cross Drive having just been completed, and the job of managing All-Tech Night at The Pops this coming June. Aside from these, there are always routine matters such as approving elections made by the various student organizations.

The prime duty of the committee this term, however, is to see that activities get back on their feet, and to assist all in being of better.

Greene Discourages Nationalism; Urges Support U. N. O.

Nations can grow up if their diplomats, their newspapers, and their people can grow up, concluded Professor William C. Greene, Department of English and History, in a lecture sponsored by the Lecture Series Committee in Room 6-120 last Wednesday. Professor Greene's lecture on the subject "Can Nations Grow Up" ended on that hopeful note, as he stated his belief that we have educated "just about enough" people to make world unity a possibility.

Using the title of the lecture as a basis, Professor Greene analyzed, with occasional digressions, each word and its meaning. The subject of the sentence, "nations," was treated first. What nationalism is, why it was originally justified, and whether or not it is still justified today were the questions posed.

Professor Greene showed graphically the relationship through diplomats, which has existed between nations to date, and how it is necessary, and possible through the United Nations Organization to reverse their relationship and make it one through the people themselves.

The phrase "grow up" was next examined and defined. Immaturity, in persons or in nations, is characterized by certain traits. Pro-

10 To Be Initiated By Alpha Chi Sigma

The formal initiation of pledges to the Alpha Zeta Chapter of Alpha Chi Sigma, the honorary chemical society, will be held early Saturday afternoon, March 30. The Initiation Banquet is scheduled for 7:00 P.M. that evening at the Fox and Hounds Club.

At the traditional pledged ceremony held Wednesday, March 27, in Room 6-321, ten men were pledged to the society. The pledges were James N. Addoms, X; John H. Dedrick, III; Wilburn H. Hoffman, X; Clarence K. Morehouse, V; James J. Ryan, V; and David J. Tobin, X—all graduates. Also pledged were Carl E. Dengler, X, 2-47; Juan C. Grau, X, 2-47; Philip S. Perch, X, 2-47; and Sidney L. Smith, X, 6-47.

Magoun's Lectures To Start Monday

Post-Marital Problems Is Topic Of Discussion

"In spring a young man's fancy lightly turns to thoughts of love," and so, on Monday, April 1, the T.C.A. will present Professor F. Alexander Magoun in the first of his spring series of lectures, "In Preparation for Marriage," to be given in Room 10-250 at 4:00 P.M. and again at 5:00 P.M.

Whereas the past semester's lectures dealt with the problems facing young people before marriage, this series will present the difficulties facing couples after embarking on the sometimes stormy sea of matrimony. There will be four talks this term to be given each Monday, starting April 1.

Happiness and Emotions

Professor Magoun explains that "The thing that is at the bottom of happiness and of character is the development of emotions. The trouble is that in our civilization we've been taught to repress them, or to give them a phoney, insincere outlet through too much jazz, too many cocktails, and too much superficial talk. If we are to be happy, we must learn to express our emotions sincerely to understand them, and so to handle them intelligently."

Marital Bliss

"Thus two people do not make a failure of marriage by resenting its bondage because they have sacrificed themselves for each other. On the contrary, they can spontaneously create together an atmosphere in which each can grow and develop far better than would be possible in any atmosphere he could produce by himself."

Options Placed On Sale Mon. To Fri. Next Week In Building 10 For \$3.00

Dr. C.D. Coryell Will Join Staff

Atom Scientist Becomes Chemistry Professor

Dr. Charles D. Coryell, who is distinguished for his work in the inorganic and physical chemistry of the isolation and identification of radioactive atoms, has been appointed Professor of Chemistry, Dr. Karl T. Compton announced Wednesday.

Dr. Coryell was a professor on the staff of the University of California at Los Angeles when in 1942 he was granted leave-of-absence to lead a research staff working on the radiochemistry of the fission products in the chemistry division of the metallurgical laboratories at the University of Chicago.

In 1943 he transferred to the newly opened Clinton laboratories at Oak Ridge, Tenn., where he was chief of a research section on radiochemistry and fission products at the first industrial atomic power and plutonium production plant. This work involved intensive research in inorganic, physical, and analytical chemistry, especially that part known as radiochemistry, together with development work on high activity radiochemical separations and remote control operations. He is now working on the final reports for the project and will join the staff of the Department of Chemistry at the Institute in July.

Dr. Coryell was a scholarship student at the California Institute of Technology from 1929 to 1932, when he received the bachelor of science degree in chemistry in three years and was awarded the California Institute of Technology Junior Travel Prize. He enrolled for a year at the Technische Hochschule in Munich, where he carried on special investigations on the fluorescence of acetone.

V.A. Representatives Handle Vets Problems

Representatives of the Training Division, Veterans' Administration, will be present in Room 2-131 on Mondays from 2:00 P.M. to 5:00 P.M., on Tuesdays from 9:00 A.M. to 12:00 A.M. and on Thursdays from 2:00 P.M. to 5:00 P.M. All veterans are urged to consult with representatives on any problems concerning the Veterans' Administration, including those attending college under P.L. 346 or P.L. 16.

Dance To Be Held At The Bradford Grand Ballroom

Johnny Long and his Orchestra will supply the music at the Interfraternity Conference formal to be held May 10, it was announced late last night by Dance Chairman Norman F. Meullen, 2-47. The dance will take place in the Grand Ballroom of the Hotel Bradford and not on the Bradford Roof as was announced in last week's issue of *The Tech*.

Options for the I.F.C. will go on sale next Monday morning, April 1, at 9:00 A.M. They will be available from 9:00 A.M. to 2:00 P.M. in the Lobby of Building 10, Monday through Friday of next week. The options are to cost \$3.00 per couple. They will be available to all Technology students, with fraternities getting preference.

Tickets To Cost \$6.60

The price for the entire ticket will be \$6.60 including tax. This will entitle the bearer to be admitted not only to the dance but also to two Saturday afternoon cocktail parties and three Saturday evening fraternity parties. The location of these parties will be announced in a future issue of *The Tech*.

Johnny Long's orchestra features the maestro's violin, Francey Lane, and Tommy Morgan, vocalists; Tex Mulcahy, trombone, and Don Palading, trumpet. Long is the only left-handed violinist in the popular field.

Successful N. Y. Engagement

The band has recently finished an extensive and successful stand at New York's Paramount Theater, and is well-known in metropolitan circles. It is one of the outstanding young organizations and has proven its success both as a show and dance band.

Chairman Meullen has begun selection of his committee. He has further announced that ticket sales will commence in the near future. Table reservations will be made after ticket sales have been completed.

Special Committees Appointed For 2-48

In an attempt to establish close cooperation and class spirit in 2-48, President Paul R. Krasner has appointed three standing committees to handle social activities, publicity and finances. These three committees will form the executive committee of the class.

The social activities committee, headed by Co-Chairmen James W. Barnett and William Ayer, has planned a social activities poll for next week. Ballots will be distributed in physics lectures Monday, with the cooperation of Prof. Francis W. Sears. The poll will attempt to discover likes, dislikes and suggestions of class members in regard to dances. Results will be published in next week's issue of *The Tech*. A dance for the class based on the results of this poll will be planned in the near future. W. John Levidohl, Secretary-Treasurer of the class, is chairman of the finance committee, and S. Leslie Misroch has been put in charge of the publicity committee. A call will be made soon for volunteers to complete the roster of the committees.

WHAT DO YOU THINK?

Following are the results of the poll on Walker Dining Service printed in *THE TECH* last week.

Average number of meals per week:			
Breakfast 5.35	Lunch 5.3	Dinner 4.57	
Improvement since February 1, 1946:			
Excellent 4.9%	Good 26.8%	Fair 43.9%	Poor 24.4%
The quality of the food is now:			
Excellent 8.9%	Good 37.8%	Fair 28.9%	Poor 24.4%
The variety is now:			
Excellent 10%	Good 26%	Fair 28%	Poor 36%
The general price structure is now:			
Excellent 4.1%	Good 20.4%	Fair 32.7%	Poor 42.8%
Is there room for substantial improvement?			
Yes 87.5%		No 12.5%

LECTURE SERIES

In the summer of 1944 there was active at the Institute a Class A Activity which called itself the Lecture Series Committee. Their purpose was to bring before Technology, problems of national interest and to try and broaden the average Techman's sense of national affairs. The only speaker that ever presented a talk under the auspices of this Committee was Leverett J. Saltonstall, then Governor of Massachusetts. Somehow or other the Committee then just seemed to fold up and die a premature death.

Towards the end of last term, however, a group of thinking students at the Institute, composed mostly of dormitory residents, decided that perhaps a revival of the defunct Committee would be in order now that the problems of peace, atomic control, etc., are staring everyone in the face.

On Wednesday the revitalized Committee presented their first speaker, Professor William C. Greene of the Department of English and History, who gave a talk titled "Can Nations Grow Up?" We hope that history won't repeat itself and that we will hear more of this Committee. A forum or round table discussion such as that presented by the T.C.A. last winter on the Atomic Bomb would provide a great deal of interest, and, if that discussion is any indication, draw large audiences.

It would do well for the Committee to go beyond the Institute for some of its lecturers, although there is a wealth of material within our walls, as was evidenced by Professor Greene's excellent dissertation. No matter how we try to sidestep the fact, however, a well-known name is an important drawing card, and if this Committee were successful in bringing before the student body eminent talkers, it will have accomplished a great deal as a student-run activity.

Don't scoff at the idea, either. Students at the Rensselaer Polytechnic Institute have organized just such a Committee, and such men as Eric Johnston, President of the United States Chamber of Commerce, have been numbered among their speakers.

DEADWOOD

The Institute Committee, at yesterday's meeting, scheduled reports from the Combined Professional Societies, the Student Faculty Committee, and the Veterans Association for the next month. The first two of these, at least, hold the distinction of being the least known of the, in general, little known groups on the campus commonly called student activities. In the case of the Student Faculty Committee this is altogether by design as it has been felt, wisely or not, that rough spots in the relations of students and staff are best disposed of in the shadows of obscurity.

The C.P.S., however, was formed to foster and promote the individual professional societies and to encourage cooperation between them. Just how this is to be accomplished is, and has been, rather vague. All this has been in the past, naturally. New men are now in charge, the war is over, things are looking better, and so on. This must not and will not be overlooked.

To get to the point, at last—these activities and others like them, unknown or not, carry to one not familiar with the intimate details, a certain amount of prestige and if we may be permitted the expression, of honor. Chairman of this, that or the other, looks good after your name in *Technique*. In reality, of course, it doesn't mean a thing.

Let's get away from this sort of thing. Cut the deadwood and concentrate effort in the limbs that are functioning.

Letters to the Editor

Editor, The Tech
 Walker Memorial.

Dear Sir:

I am afraid that Mr. Robinson in his discussion of the movement for a "National Friendship with Russia Week" in last week's issue misses the point entirely. He implies that this is one more signal that "America is unwilling to fulfill its world commitments" and suggests that to support our new foreign policy in the U.N.O. would be a better policy. How these ideas can be read into the letter is beyond my comprehension.

All this letter so ably says is that we don't want war with Russia, and that we are confident that we can solve our common problems around a conference table in a spirit of cooperation and friendship. The writer may not be aware that there are small, strong, vocal elements in our population who would have the rest of the world, especially Russia, believe that the Americans as a whole hold to the opposite view. The purpose of this letter is solely to make it known to the rest of the world, by an overwhelming expression on the part

(Continued on Page 4)

Fogarty Sells Out; Corners Market On Odds And Ends

The dorms this week seem to be experiencing a general housecleaning. One fellow, anyway, Jack Fogarty by name, is by all indications trying to get rid of practically everything he has in his room, and it might be well for Mr. Dow, the Manager of the dormitories, to take care that the fellow doesn't sell his bed and wash basin.

Fogarty seems to be a person of versatile avocation, because the items he is selling include such things as a Spanish Guitar, a 100 power telescope, a biology kit, and a 2" oscilloscope. One of his lists is headed, "I am giving up chemistry." Jack, does the Institute know about this? This list covers everything that the handy-dandy little chemistry set offers and more, and we understand they are going at bargain basement prices.

Naturally this quantity of material that is being sold has caused a certain amount of conjecturing among dorm residents as to why Jack is so eager to part with possessions that seem to be the accumulation of several years collecting. The general consensus is that General Hershey has finally caught up with the poor fellow, but in a special interview granted *The Tech*, Mr. Fogarty denied all reports of imminent induction. He stated that he brought the pile of junk from his home in Plymouth, and having no more use for the stuff he thought that some eager Techmen might be able to derive some benefit from it.

We, however, are inclined to ques-

Glider Excursions Planned By A. E. S.

Air-minded students will be interested in the announcement that the Aeronautical Engineering Society, inactive since 1944, has resumed its activities. The society is open not only to those majoring in Aeronautical Engineering, but also to all who have some interest in aviation.

The A. E. S. is an independent organization, and is not connected with the Institute of Aeronautical Sciences. Included among the A. E. S. activities are a glider group, a model group, lectures and movies. The society is planning to present several lectures by prominent men in the aviation field, in cooperation with the I. Ae. S. Later in the spring several glider trips will be taken. Students interested in aviation are urged to join the society, and information can be obtained in Room 1-150 on Wednesdays at 4:00 P.M.

Officers of the A. E. S. who were recently elected include Frank H. Durgin, 6-47, President; Richard E. Seaman, 10-46, Vice-President; Carl S. Newman, 6-47, Secretary, and Marvin W. Sweeney, 6-47, Treasurer.

tion this seemingly innocent explanation. Where would any decent law-abiding person pick up such things as a Rogers 29 airplane engine, a hydrotelk, or a high-pressure tank of Butane? Do we have an arch criminal in our midst, who steals aircraft engines from the East Boston airport, and impossible-to-get butane from Government research labs? Or is he just a fence

AWARD FOR SERVICE

A sleeping village in the path of a raging flood . . . at her switchboard an operator makes call after call to alert the community and summon aid. She leaves only when rising waters reach the board and the building itself becomes flooded.

For this and similar acts of public service, more than 1,200 telephone men and women have received the Bell System's most coveted award—the Theodore N. Vail Medal.

Service to the public has long been a tradition in the Bell System. The thought "service first"—day by day as well as in emergencies—has helped give this nation the best communications service in the world.

BELL TELEPHONE SYSTEM

Joe Levis, Ace Fencer, Returns To Coach Team

Plans Much Training To Put Prepared Team Into Field Next Year

Coach Joe Levis is back at Tech after a three-year separation from his favorite sport, fencing. The newly organized squad of 25 sophomores, freshmen and veteran swordmen has resumed the ancient form of exercise outmoded by warfare. Interest and enthusiasm are running exceptionally high as practically the entire Tech undergraduate squad is starting from scratch. The squad has been taking lessons since early January, and Coach Levis is going to keep them strictly on lessons and exercise for a while and forbids dueling for at least another month for all except two or three who have made rapid progress.

It is said that men of Italian ancestry, like Levis, take as naturally to fencing as ducks to water. It is very likely that Levis is the very impetus that has put Tech fencing on its feet this year. Levis, a Tech graduate of 1926, captain of the Tech D'Artagnans, and Intercollegiate Foils-champion, since graduation he has walked off with five national championships and due to his position as outstanding American fencer he was rewarded with the captaincy of the 1936 Olympic Team. Levis joined the professional ranks in 1939 by taking the Tech coaching berth.

Fencing Is Different

"Fencing is different than gymnastics, tennis, rowing and other sports because the teacher can't stand on the sidelines and get his ideas across," asserts Levis. "He must get in there and exercise with the promising youngsters and try to bring out their latent talents."

Levis maintains that it takes a minimum of six or seven years to develop a good fencer. The art of lunge and parry is an extremely intricate one. At Tech where most of the team members are novices, the period of training must be cut down to two years or else.

Many Outstanding Newcomers

Outstanding among the Engineer fencers this year is Mario Ubati who possesses exceptional natural qualities and holds a great future. Harold C. Bjerke, a Norwegian fencer is also very excellent material. He is very aggressive and fast and possesses the characteristics of an A-1 swordsman. John Weil, out for the first time, is making excellent headway in Epée.

At present there exists a wealth of graduate fencers who have returned to help out the new squad. Those providing instruction besides Levis are Bob Gooding, class '42, U.S. Naval Academy, captain of the 1942 Sabre team. Vince De Pois, '39, U. S. Naval Academy Intercollegiate foils champion 1939. (Incidentally the referee in the match at New York that gave De Pois his championship was our own fencing coach, Joe Levis.) Bob Sweek '42, W. S. Naval Academy was the number one Epée man of the Navy Team that year.

Paratroop Hero Instructing

Combined with skill and speed, courage is essential to the success of the team. At the present time the team is honored with the able instruction of Tech's graduate fencer, Bill Kellog, '42, second World War parachute hero and recipient of many war medals for heroism and decorations in Holland, Belgium and Russia.

Dorm Softball Tourney Begins

Round-Robin Planned With Graduate House

The Dorms under the direction of the new athletic chairman, Art Schwartz, are planning a round robin of all the dorm teams. The senior house is also scheduled to compete with the new and old undergraduate Dorms to enlarge the regular competition to six teams. With the Hayden team already organized and practicing regularly and the other teams rapidly forming the tournament promises to set a fast pace and to put the Dorms in shape for the coming Beaver Key competition.

When the Dormitories entered the finals of the basketball tournament last term with three of their six teams represented along with the sole fraternity member, S.A.E., the Dorms showed their athletic prowess. Now with the softball season commencing with Dorm competition to awaken this hidden prowess again, the fraternities can expect further tough Dorm athletic encounters in the future.

Week's Schedule

April 2—Walcott vs. Runkle, Bemis vs. Nichols.
April 3—Goodale vs. Holman, Munroe vs. Hayden.
April 4—Wood vs. Walcott, Hayden vs. Runkle.
April 6—Nichols vs. Goodale, Holman vs. Munroe.

Track Team Holds Official Opening

The commencement of the track season was heralded in on Tuesday evening, March 26, by a rally on Briggs Field attended by over 85 enthusiasts. The meeting which showed the high percentage of new men on Tech's track team was conducted by Robert Meny, the president of the Track Club. Captain John Serrie and student manager Edwin Dougherty addressed the new aspirants to health and honor for M.I.T.

The P.T. competition which is now in its third week, is expected to be completed by this weekend according to coach Oscar Hedlund. Trainer Johnson followed on the program with a short talk and as an extra added attraction refreshments were served through the courtesy of Jerry Russo.

Dr. Coryell

(Continued from Page 1)

Dr. Coryell carried on graduate work at the California Institute of Technology and was one of the last graduate students of Professor A. A. Noyes, formerly of Technology. He received the degree of doctor of philosophy in physical-inorganic chemistry in 1935. In 1938 he joined the staff of the University of California at Los Angeles as an instructor in introductory chemistry, quantitative analysis, and physical chemistry. He was made an assistant professor in 1940 and associate professor in 1944.

Dr. Coryell is a member of the American Physical Society, of the American Chemical Society, the American Association for the Advancement of Science, Tau Beta Pi, and Sigma Xi, and is an honorary member of Phi Lambda Upsilon.

Lacrosse Team To Wage First Battle With Boston Team

Teams Will Meet On Briggs Field Saturday No Admission Charged

Under a new coach, the Tech Lacrosse team will meet its first opposition this Saturday on Briggs Field facing an older and more experienced team. Coach Martin hopes to find exactly how strong the team is at the present time. The Boston Lacrosse consists chiefly of returned veterans who wish to resume the old tough and rugged game. Besides these veterans there are a large number of former College varsity players from Harvard, Princeton, and Colgate.

With only a few men remaining from last year's team, Coach Martin hopes to mold a team that will be able to hold its own in intercollegiate competition.

'45 Varsity Will Start

The team will probably start most of its last year's members captained by Ciccone. "Ebbie" Snell will probably start along with Phil Macht.

The game will start at 2:30 sharp at Briggs Field. No admission will be charged.

Coach Smith Will Offer Swimming Instructions

With the return of warm weather and the end of the swimming season the Alumni Pool with all its facilities is now open to Institute students, staff, and personnel, from 2:00 P.M. until 6:00 P.M. every day, Monday through Friday.

Any person who would like to receive instruction in swimming should see Coach Smith at some time within the above hours. In the future, regular swimming classes and instruction in Senior lifesaving may be scheduled.

The Alumni Pool has all the necessary equipment for swimming; lockers are provided, and valuables are checked. The only requirement is that swimmers either obtain a locker card or bring their own towel.

Professor Green

(Continued from Page 1)

Professor Greene's analysis showed them to be egoism, backed by fighting when necessary to satisfy the egoism; exclusiveness, or a tendency to band together with little concern as to its effect on others; the use of emotions rather than reasoning in making decisions; and a lack of what can only be described as "gentlemanliness," or a courteous attitude towards the other fellow. These are the traits which must be eliminated in both men and nations before they can be considered "grown up."

The question of "can" is the crux of the matter, and it was on this word that Professor Greene concluded his remarks. A vigorous discussion of United States foreign policy and the world situation, a strong support of the UNO, and an equally strong rebuke of newspapers in general and certain ones in particular, led to the conclusion that we must, through education, grow up, and as we grow up, so will our nations. A question period followed.

The next lecture in the series will be held on Thursday, April 18. Professor D. J. Struik of the Math Department will speak on the subject, "What Can We Expect from the Soviet Union."

Contrary to the erroneous report printed in the last issue of The Tech, the Lecture Series Committee is an independent organization in no way connected with the T.C.A.

Rowers 'Receive Crew Schedule

Banquet To Be Held April 10, In Pritchett

The crew schedule for the coming season has just been released and promises a busy season for the rowers. As the schedule stands to date, there are five meets, three to take place on the Charles River Basin and two to be away. The main event of the season will be the meet in which nine schools will enter shells. It will take place in Annapolis with some of the best college teams participating.

The Schedule

May 4—Cornell, Harvard, Princeton, MIT, at Cambridge.

May 11—Harvard, Rutgers, Princeton, Wisconsin, MIT, Navy, Cornell, Columbia, Pennsylvania, at Annapolis.

May 11, Harvard, Princeton, Pennsylvania, MIT, at Cambridge.

May 18, Harvard, MIT, at Cambridge.

May 25—MIT, Pennsylvania, Wisconsin, at Philadelphia.

Coach McMillan, the crew coach, has expressed himself to the effect that he is more than satisfied with the work done by this year's team in practice. The veteran rowers of last year compose a great deal of the Varsity team but are continually being hounded in practice races by the Junior Varsity which is composed of new men. The Junior Varsity has come very close at times to beating the Varsity in many races.

Tech Racquetmen Draw Big Turnout

The Technology tennis team held a rally on Wednesday, March 27, at 5:00 P.M. in Litchfield Lounge of Walker Memorial. It was the largest turnout for the net sport since the pre-war era. William R. Zimmerman, 10-47, manager, welcomed the hopefuls and outlined the program for practice and elimination. The schedule of intercollegiate contests was discussed.

"Jack" Summers, coach of the Tech racquetmen, offered his services to any team member desiring special instruction. It was stated that the six singles and three doubles places were practically wide open, since there is only one letter man returning from last year's team.

Zimmerman expressed the opinion that Tech's chances for a successful season are brighter than they have been for several years.

Shore School Will Begin Next Week

Shore School will conduct its first class April 8 in room 2-390 from 5 to 6 P.M. The Shore School classes will last until April 19 and the exams will be held from April 22 to 26. Helmsman classes will commence May 6 and continue until the seventeenth with the members of the class going out on the Charles with experienced dinghy handlers, with the examinations for helmsmen to be held from May 20 to 24.

If anyone desires to become a helmsman and has the right to use the dinghys he must obtain a membership card from the Institute Cashier and comply with the rules and regulations posted on the bulletin board in the Sailing Pavilion.

Sailing Begins With Pavilion Opening April 1

Charles River Basin Succumbs To Dinghies As Sailors Practice

Next Monday, April 1, sailing will officially begin at the Institute for those who have their sailing cards. The past few days have served as a reassurance that spring is here since many of the sailors from last year's team have been out on the river getting some practice for the coming season which is quite a full one.

The 1946 spring schedule, which at present contains 34 different events, is the most comprehensive yet attempted by the Inter-Collegiate Yacht Racing Association. It represents an endeavor to carry out the Executive Committee policy of providing as much competition as possible for all hands, and especially for those colleges which lack racing facilities of their own or arrangements with nearby colleges.

The sailing team has its first regatta April 6 with Navy in 14-foot dinghies, on the Severn River. It will be the first meet for Navy and Tech and the outcome cannot be predicted since neither team has had much practice as yet. The first home meet in which the Tech dinghies will take part will be April 13 in a Pentagonal Regatta between Technology, Harvard, Holy Cross, Northeastern and Tufts, with 12-foot dinghies.

Tentative Schedule

Saturday, April 6—M. I. T. vs. Navy, Annapolis.

Saturday, April 13—Pentagonal Regatta, Charles River Basin.

Sunday, April 14—Greater Boston Dinghy Championship, Charles River Basin.

Saturday April 20—M. I. T. vs. Coast Guard, Charles River Basin.

Sunday, April 21—Boston Dinghy Club Challenge Cup, Charles River Basin.

Saturday, April 27—Invitation Regatta, Princeton.

Sunday, April 28—George Owen Trophy, Princeton.

Sunday, April 28—Invitation Regatta, Charles River Basin.

Saturday, May 4—Triangular Regatta, Providence.

Sunday, May 5—Lucian Sharpe Memorial Trophy, Providence.

Sunday, May 5—M.I.T. vs. Dartmouth, Charles River Basin.

Tech At Pops Set For June 1

Entire Seating Capacity Reserved For Institute

Tech night at the Pops is to be held on June 1, at Symphony Hall, was the report given to the Institute Committee at their regular weekly meeting held yesterday at 5:00 P.M. in Litchfield Lounge. The entire floor, consisting of 1200 seats, is to be reserved for Technology.

Other business taken up at the meeting included the approval of a motion asking C.P.S., Veterans' Association, and Student Faculty Committee to submit reports to the committee on April 11, April 18 and April 25, respectively. The newly elected slate of Outing Club officers, including James A. Burns, 2-47; John M. Carney, 2-48; Alan Blechatein, 2-47; Donald E. Ridgely, 2-47; Leonard Bezark, Jr., 2-48; Robert L. Silverman, 2-47; J. M. Kamienieski, 49, was quickly approved.

Henry Koerner, 6-46, was approved as the new Dormitory Committee chairman. The Committee also acted favorably on the appointment of William W. Powell, G, to the executive committee of the Nautical Society.

David R. Herwitz, 6-46, and John A. Contegni, 2-47, were absent.

Dances And Stag Parties On V.A. Social Calendar

Members of the Veterans' Association have been requested, through the use of printed postcards, to give their approval of various social activities planned for the spring term. According to Paul R. Krasner, 2-48, president of the group, the cards are being returned to the V. A. and the results of the poll will be available next week.

A stag beer party, a combined beer party and dance, and teas for married couples are a few of the social functions which the V. A. members are considering. Also planned are an acquaintance dance and a date dance at Walker Hall. Any veteran desiring to join the Veterans' Association may do so by contacting P. R. Krasner in Hayden 414, or William H. Ayer 2-48 in Runkle 204.

Schell To Speak At T. C. A. Smoker

Religion To Be Topic Of New Lecture Series

The T.C.A. will hold a smoker this afternoon at 5:00 P.M. in the T.C.A. office, Walker Memorial, at which time Professor Schell, head of the department of Business and Engineering Administration will deliver a talk on the advantages of extra-curricular activities. All students are invited to attend.

A new lecture series will be presented by the T.C.A. on the subject of modern development in religion, the first of these to be held on April 3 at 4:00 P.M. in room 10-200. The topic of the address will be "Recent Biblical Investigations" and will be delivered by Dr. Edwin Broome, of the Harvard Biblical Research Staff.

This weekend a conference of newly elected presidents of the various Christian associations of the New England colleges will be held at the Andover-Newton Theological School in Newton Center. The T.C.A. will be represented by its president, Marvin Sparrow, 6-46. The conference is to be an informal workshop regarding the program and activities a Christian association should present.

Radio Soc. Elects Geyer President

As the first step in the post-war reorganization and expansion of the Radio Society, its Executive Committee met last Monday, March 25, at 5:00 P.M., in Room 10-369, to elect officers. The following men were selected: President, Bernard H. Geyer, 10-47; Vice-President, Norman L. Brown, '45; Station Manager, Victor Mayper, Jr., 2-47; Treasurer, Jules S. Levin, 10-47, and Secretary, Cassius M. Clay, 10-47.

Definite dates for code classes will be set at the next meeting, which is to be held next Tuesday at 5:00 P.M. in Room 10-267. The technical committee for rebuilding Station WIMX has been announced. It consists of Parker Painter, '49, Geyer, Mayper, and Pierre A. Portmann, 6-47.

Fogarty

(Continued from Page 2)
disposing of "hot" loot for an underworld confederate? Come on, Jack, fess up, give us your real reasons before the law catches up with you.

Anyway, in case any of you are stumped for presents for your mother's-in-law birthday, we are printing the following list to help you out. 200 broken ink bottles, 8 boxes of used KLEENEX, assorted collection of iron filings, limited number of used valentines, trigonometry books—missing pages, small amount of doorknobs, 2 blue sweaters without necks, 1 dozen broken pencils, 4 pounds of chicken feathers, tap water—unlimited supply, 1 1/2 pairs of soleless shoes, large pile of broken window panes, 3 used erasers, 4 old tooth brushes, 1/2 pound of headless nails, one closet lock from Hayden 312, and a doorknob from Hayden 503.

This list doesn't appear to be consistent with the others, and we believe that it is possible that someone is kidding Jack to stir up more trade than he can handle. Better watch it, Jack. Don't let 'em get away with it.

Outing Club Plans Week-end Bike Trip

Signs of spring were reflected in the Outing Club's schedule of trips for this and next weekend. The last ski trip of the season, to Tuckerman's Ravine on Mt. Washington, is being held this Friday through Sunday. Also on Sunday of this week are the first two bicycle trips of the season.

One of these is a combination bike or hike trip to Nobscott Hill. The group will meet at South Station at 9:00 A. M., and those who wish to do so may check their bikes. Tickets should be bought to Framingham.

The other bicycle trip is to Concord and Lexington. The outing starts in front of Walker Memorial at 9:30 A. M. Equipment for either trip is a pack lunch, plus a bicycle.

The following weekend, a joint Tech-Simmons canoe trip and possibly a rock climbing trip is planned. Details of these two trips, as yet unavailable, will be posted on the Club's bulletin board in Building Ten by Tuesday of next week.

Agenda Plans To Initiate Eleven Dorm Sophomores

Agenda, honorary dormitory society for Sophomores, will initiate eleven members of the Class of 2-48 on Monday, April 8. The pledges, who were unanimously selected by the society on March 20, are William H. Ayer, Robert L. Stern, John D. C. Little, Paul R. Rothery, Jr., Henry Warner, and Robert L. Silverman. Also pledged were Herbert S. Kindler, Leonard P. Salter, Charles A. Herbert, Robert R. Mott, and Frank M. McGowan.

Letters

(Continued from Page 2)
of the people of America, that this is not so.

As for what good this may do—I have the feeling that the casting out of any unwarranted fear of us by the Russians (we have the atomic bomb, you know) can do more to create a healthy atmosphere for the settlement of our common problems than any other method known.

I would like to have any and all who see in this movement what I see in it (and not more) endorse it, and spread it throughout the country.

Sincerely,
GEORGE G. BROOKS, G.

Editor The Tech,
Walker Memorial.

Dear Sir:

We read with interest your report on "Elections Statistics, but find a slight discrepancy in your computations. A grand total of 117 ballots were cast out of the 690 delivered to Dorm residents which, on your slide rule, comes out to a "cool 16.5%". We first checked your computation on our pocket-size slide rule, but getting a different result, we turned to our faithful Log-Duplex Decitrig. Still in disagreement, we went to Burlington's log tables, worked it out by long division, and finally in despair, resorted to the Associate Tutors' slide rule. Using all these methods we came out to a "hot" 16.96%.

We understand that the Coop carries an excellent manual on how to operate a slide rule.

Respectfully yours,
Helmut Onusseit, 2-48,
Norman W. Stewart, 10-47,
Donald H. Archer, 2-48.
Sorry, but a Course XV man worked it out.—(Editor.)

Hal Reeves to Play For Spring Frolic

Bowling, Refreshments Among Dance Features

The Dormitory Dance Committee has announced the details of two forthcoming social functions—the "Spring Fancy" acquaintance dance, to be held on Friday, April 12, and the Spring Frolic, sponsored jointly by the Dance Committee and the 5:15 Club, on Friday, April 26.

The "Fancy," whose timely occurrence gives Tech men an opportunity to select a date for the Spring Frolic, will bring a total of 300 girls from nine schools to Walker Memorial. Colleges which have accepted invitations are Wellesley, Radcliffe, Simmons, Pine Manor Junior College, Mount Ida Junior College, Katherine Gibbs, Boston University, Emerson, and Wheelock. Lasell Junior College was unable to accept. Dancing, with music by the Techonians, will be from 8:00 P.M. to 12:00 P.M.

The Spring Frolic, the big dance of the term, will offer in addition to dancing from 9:00 P.M. to 2:00 P.M. with music by Hal Reeves, several additional attractions. They include free bowling, free Chesterfields, open lounges, refreshments, and an entertainment program featuring a magic act by John W. Weil, 10-47. In his usual mystic manner, Committee Chairman Robert P. Abelson, 10-47, tells us to watch for an announcement of novel decorations to be tried at the Frolic.

Tickets for either dance may be obtained from Committee members or in Building 10 one week before the "Spring Fancy" and two weeks before the Frolic. Open house in the dorms has been requested for both nights.

A.I.E.E. Announces Future Trip Plans

Future trips were discussed, and plans for them made, at the American Institute of Electrical Engineers' meeting on Wednesday, March 27, in Room 5-208. The following trips are among those definitely on the schedule:

Early next week the group will visit the General Radio Corporation's plant. The signup for this trip will be posted in the E. E. office. Also planned is a tour of National Radio Corporation on Wednesday, April 17. Only a limited number of members may go on this trip, as the plant is restricted for security reasons. The signup will go up considerably in advance, so that the names of those planning to go may be checked by the Navy. Announcement will be made when the signup is ready.

Additional trips planned are a tour of one of the radio tube manufacturing plants, the Bell Telephone Company, the Frequency Modulation station at Hull and the Simplex Wire and Cable plant. Plans for a dinner party are also being formulated.

Debaters Discuss Military Training With Yale Tonight

Debating Tournament On Labor Arbitration Planned For April 26

Permanent peacetime military training is to be the subject of a debate tonight at Technology with Lee Hanower, 2-47, and James T. Todd, 6-46, upholding the negative against Yale University at 7:00 P.M. in Litchfield Lounge in Walker Memorial.

Last Friday evening Hanower and Todd successfully defended the negative of the same topic against Middlebury College. Mr. Richard P. Harmon of the department of English and History awarded the decision to Technology in this debate.

Encounters Opposition

Hanower and Todd, however, met stiffer opposition last Saturday afternoon when they debated against a well-organized West Point team. The topic and the side were the same as in the above debates. The Cadets were judged winners by Professor Douglas P. Adams of the department of Graphics, Dr. Thomas H. D. Mahoney of the department of English and History, and Lt. Col. John C. Dunbar, C.A.C., head of the Military Science Department.

A New England Debating Tournament will be sponsored by the Debating Society on the weekend of April 26-27. The topic is scheduled to be Resolved: That the federal government should enact legislation requiring the settlement of all labor disputes by compulsory arbitration when voluntary means of settlement have failed, constitutionality conceded.

15 Colleges in Tournament

This tournament is the first step towards the restoration of New England debating to its pre-war level. The response from surrounding schools has been encouraging with 15 colleges already scheduled to participate. Lee Hanower, debate manager, is in charge of arrangements.

Inst. Comm.

(Continued from Page 1)
ter service to the undergraduate body. Black announced, "The Institute Committee intends, through sub-committees, to help provisional Class A activities to become worthy of permanent Class A status. Our actions are governed solely by what we honestly feel to be the best interest of the student body. If an organization is worthy as a result of its own particular benefits to the student body, we are more than glad to grant them Class A recognition."

There is at present a problem as to whether there will be enough activities in operation this summer to warrant a summer session of the Institute Committee, and if there are the Committee will continue as usual.

The meetings are open to all students, and it is hoped that those interested drop into Litchfield Lounge some Thursday and sit in on a meeting of the Institute Committee.
